## FRUIT TREE STOCKS

We specialize in growing and distributing fruit tree stocks, maintaining extensive plants in the North—West and in the Topeka, Kansas district.

We have been engaged in the seedling business for over 50 years and know how to grow and handle them. Our seedlings are kept well sprayed during the growing season; are healthy, thrifty and not dug until well ripened. Our many satisfied customers are proof our seedlings will give satisfaction.

**WESTERN GROWN**—Our experience has demonstrated that due to favorable climatic conditions western seedlings are superior for planting. We are using all western grown apple seedlings for our grafting and budding stocks. Also use the other varieties of western grown fruit tree stocks for our own budding. We have a perfect stand of apple stocks planted this spring and they have made a fine growth.

**FUTURE ORDERS**—We are always glad to quote prices and book advance orders. This gives us an opportunity to secure the necessary amount of seed and plant to insure 100% delivery. We solicit your inquiries and orders.

**GRADES**—We make strong grades that please our customers.

We are frequently able to make shipment in car lots for various distributing points, such as Dansville and Rochester, New York; Painesville, Ohio; McMinnville, Tenn.; etc.

## DECIDUOUS TREES

Our Shade and Ornamental Trees are first-class, well-shaped, young and vigorous nursery grown trees with good roots. They have been grown from seedlings transplanted in nursery row especially for this purpose.

All calipers taken 6 inches above the collar.

Balling and burlapping extra. The following prices are made to cover ordinary size balls,—a ball large enough to safely transplant the tree.

**BARBERIS MENTORENSIS**

Plant Patent No. 99

(Sun or shade—ultimate height 5 feet)

Barberry Mentorensis is the result of a cross between Barberry Thunbergi and Barberry Juliana. It is a plant with very rugged, strong, upright growing branches and heavy thorns. Its foliage is heavy and thick and of perfect color—a green as dark as the Japanese Yew.

## IRIS

In making up this Iris List we have divided our list into three separate groups. We have our group of "Extra Good" varieties, "Medium Priced" varieties and "Common varieties". This grouping does not mean that the "Common varieties" are poor Iris. There are a lot of good varieties in this cheaper group, such as Afterglow, Gertrude, Pallida Dalmatica and others, but they are older and stock is more plentiful and as a result they carry a cheaper price.

### EXTRA GOOD VARIETIES

This list contains some of the World's finest Iris. Practically all of them are recent introductions and are much improved over the old type. If you have never handled any of these "Extra Good" varieties, it would be our suggestion that you try a few of them. Your customers will enjoy getting acquainted with them.
